

SBCA offers online certification in MDU Systems, Analog SMATV Systems, and DIRECTV's D2 Advantage Multiple Dwelling Unit system. The required course modules and exams for each certification are shown in the table below.

| Course module   | SBCA MDU Certification | SBCA SMATV Certification | SBCA D2 Advantage Certification | SBCA D2 Advantage Plus Certification |
|---|------------------------|--------------------------|---------------------------------|--------------------------------------|
| SB101: SBCA online learning & certification overview  | ✓                      | ✓                        | ✓                               | ✓                                    |
| SB102: RF and DC Theory for Satellite Systems         | ✓                      | ✓                        |                                 | ✓                                    |
| SB103: Theory of Satellite TV Systems                 | ✓                      | ✓                        |                                 | ✓                                    |
| SB104: Test and Measurement in Satellite TV Systems   | ✓                      | ✓                        |                                 |                                      |
| SB105: Analog SMATV systems                           |                        | ✓                        |                                 |                                      |
| SB106: MDU systems                                    | ✓                      |                          |                                 |                                      |
| SB201: The DIRECTV D2 Advantage system                |                        |                          | ✓                               | ✓                                    |
| SB202: D2A Components                                 |                        |                          | ✓                               | ✓                                    |
| SB203: D2A Wiring and Setup                           |                        |                          | ✓                               | ✓                                    |
| SB204: AIM for D2A Overview                           |                        |                          | ✓                               | ✓                                    |
| SB205: D2A Validation, Troubleshooting, and Upgrading |                        |                          | ✓                               | ✓                                    |
| Certification/recertification exam                    | ✓                      | ✓                        | ✓                               | ✓                                    |

**SBCA offers and recommends the Annual Subscription, which includes ongoing access to all previously-enrolled courses (standard access is limited to 5 months from enrollment), access to all new versions of courses (including any new courses required for your recertifications), all reference materials from enrolled courses, and free access to all recertification exams you are eligible for, all for a fixed annual cost.**
